The Michigan Public Service Commission (Commission) will hold a public hearing to consider DTE Electric Company's (DTE Electric) September 30, 2016 application, which seeks approval of the Company's PSCR plan and for a levelized 2017 maximum PSCR factor of 2.14 mills per kWh in customers' electric bills for the period January 1, 2017 through December 31, 2017. DTE Electric also seeks the Commission approval of: 1) the recovery of mercury and alkaline sorbents, urea, NO_x and SO_2 allowance expense and approval of calcium bromide expense as a recoverable PSCR cost for the 2017 PSCR Year and thereafter, 2) fuel consumed in the generation of electricity at plants that have negative net generation in any given month be reconciled in the PSCR, 3) the Company's five-year forecast without issuing any Section 7

warning pursuant to MCL 460.6j(7), whereby DTE Electric will seek to recover, beginning in 2018, the reasonable and prudent cost of new, yet to be determined, pollution-control chemicals whose primary purpose is to reduce the emission of regulated pollutants at any of the Company's electric generating plants associated with burning any fossil fuel such as coal, petcoke, oil, natural gas, or diesel as PSCR expenses, 4) DTE Electric's interpretation of MCL 460.6j(13)(b) as matter of law as discussed in witness testimony, 5) the transfer price treatment of renewable energy in DTE Electric's PSCR process as proposed in the Company's testimony and exhibits; and 6) the expense associated with DTE Electric entering into a Precedent Agreement and Rate Agreement with NEXUS Gas Transmission to provide firm natural gas transportation for 30,000 dth per day beginning November 2017, increasing to 75,000 dth per day starting on the later of May 2020 or when DTE Electric has added the required generating capacity and supporting infrastructure needed to utilize the increased volume requirement.
