J-03a

Dear Members of the Troy City Council,

This spring, 40 of Susick Elementary's 3rd-5th grade students participated in an after school program titled Box City. The purpose of the program is to plan, design and build a model city. Students discuss the concepts of zoning and city design. The Troy city directors, Mr. Miller, Mr. Stimac, and Mr. Richnak, were instrumental in helping our students obtain a deeper understanding of the planning, zoning and public works of the City of Troy. They went out of their way to accomodate our limited time frame. They worked very well with the students and answered all of their questions. Their participation really helped to enrich our program and make it a success.

Sincerely,

Ellen Rozych
