

VARIANCE REVIEW STANDARDS ZONING ORDINANCE SECTION 15.04 (E) (2)

Dimensional or other non-use variances shall not be granted by the Zoning Board of Appeals unless it can be determined that all of the following facts and conditions exist:

- a) Exceptional characteristics of property for which the variance is sought make compliance with dimensional requirements substantially more difficult than would be the case for the great majority of properties in the same zoning district. Characteristics of property which shall be considered include exceptional narrowness, shallowness, smallness, irregular shape, topography, vegetation and other similar characteristics.
- b) The characteristics which make compliance with dimensional requirements difficult must be related to the premises for which the variance is sought, not some other location.
- c) The characteristics which make compliance with the dimensional requirements shall not be of a personal nature.
- d) The characteristics which make compliance with dimensional requirements difficult must not have been created by the current or a previous owner.
- e) The proposed variance will not be harmful or alter the essential character of the area in which the property is located, will not impair an adequate supply of light and air to adjacent property, or unreasonably increase the congestion in public streets, or increase the danger of fire or endanger the public safety, or unreasonably diminish or impair established property value within the surrounding area, or in any other respect impair the public health, safety, comfort, morals or welfare of the inhabitants of the City.

BOARD OF ZONING APPEALS

The Board of Zoning Appeals is a group of seven of your neighbors or peers appointed by City Council to pass judgment on requests for variances and other matters that are brought before them. A variance is a relaxation of the literal provisions of the Zoning Ordinance. Petitioners must indicate a hardship or practical difficulty running with the land that would warrant the granting of the variance.

PROCEDURE

The Board will hear the items in the order that they appear on the agenda. When an item is called, the Chairman will verify that the petitioner is present. Then the City Administration will summarize the facts of the case. The petitioner will then be given an opportunity to address the Board to explain the justification for the action requested.

After the petitioner makes their presentation, and answers any questions that the Board may have, the Chairman will open the Public Hearing. Any person wishing to speak on the request should raise their hand and when recognized by the Chairman, come up to the podium and sign in on the sheet provided. The speaker should identify themselves with name and address, indicate their relationship to the property in question (i.e. next door neighbor, live behind the property, etc.) and state whether they are in favor of or against the variance request and give reasons for their opinion. Comments must be directed through the Chairman. Comments should be kept as brief as possible and closely pertain to the matter under consideration. Only one person will be recognized by the Chairman to speak at one time.

At the conclusion of public comments the Chairman will close the Public Hearing. Once the Public Hearing is closed, no other public comment will be taken unless in response to a specific question by a member of the Board. The Board will then make a motion to approve, deny, or table (delay action) the request. In order for the request to pass a minimum of four votes for approval are needed. If the request is not granted, the applicant has the right to appeal the Board's decision to Oakland County Circuit Court.

Sub: Application of Variance for Split lots B & C for current Property Location 4820 Livernois

Dear Sir/ Madam,

I, Ashish Manek and my wife Minal Gada (Current Owners) of property @ 4820 Livernois Rd, Troy, MI 48098. We are proud residents of city of troy for last 6 years and 4 years at current resident. We would like to apply to split the lot as per drawings submitted in this application.

Currently there is one house (Our residence)on this lot. This is a unique lot. Keeping the location of this house in mind, we could develop 3 lots. We don't intend to demolish or move current house.

All 3 lots meet the city of troy acreage requirement, However 2 of this lots don't meet the frontage lot requirement. Hence we are asking for variance. All this lots are unique compare to other surrounding lots as they have more depth. Please find attached document that support the following.

- 1) Average Acreage in surrounding subdivision
- 2) Average depth and width in surrounding subdivision.

As our proposed lots meets acreage requirement and as per our survey this three lots would not cause any kind of adverse effect to properties in immediate vicinity or in the zoning district. Infact they would give more revenue to city of troy in taxes.

We plan to build unique energy efficient house on this lots that meets requirement of City of Troy and State of Michigan.

We request you to approve our application.

Thank you for your cooperation.

Yours sincerely

Minal Gada and Ashish Manek

The next 3 exhibits are City-provided.

The intent of this information is to give the Board a numerical idea of lot layout in the area. The exhibits show the *lot frontage* for selected lots.

The first example comprises of properties within 300 feet of the subject property.

The second example comprises properties within a random “block”

The third example comprises of all properties within the platted subdivision, excluding one lot that does not have a house (appears to be a detention pond)

At the end of each exhibit are calculations showing the average lot frontage and one standard deviation.

Keep in mind:

The information is for *lot frontage*, which is different than *lot width*. Lot frontage is the width of the front lot line. Lot frontage is not regulated by the Zoning Ordinance. Lot width is measured at the front setback line. In this district that is 40 feet back from the front lot line.

By using the map, you can estimate which lots might have a wider or narrower lot width than the frontage.

By calculating a standard deviation, you can further examine (statistically) whether the average frontage skewed by a small number of lots that are either very wide or narrow.

Applying one standard deviation to either side of the average frontage tells us where about 68% of the lots within the sample fall.

From Wikipedia:

“**The Standard deviation** is a widely used measurement of variability or diversity used in [statistics](#) and [probability theory](#). It shows how much variation or “[dispersion](#)” there is from the “average” ([mean](#), or expected/budgeted value). A low standard deviation indicates that the data points tend to be very close to the [mean](#), whereas high standard deviation indicates that the data are spread out over a large range of values.”

Subject: April 19th zoning board meeting concerning property @ 4820 Livernois
Date: Monday, April 11, 2011 5:04:36 PM

To Whom it may concern,

The Belzair Property Owners Association would like to share some concerns about the proposed lot division and talk of site condos on this property. I am attaching deed restrictions and by-laws from our association. Mr. Manek and Ms. Gada are active members of our association, but haven't shown us any of their plans.

As president, I spoke with Mr. Evans and showed him our deed restrictions which he hasn't seen before. He has a copy of the complete restrictions. I was shown the proposed division of 85 ft frontage which doesn't comply with the city of Troy or our deed restrictions.

I have also been told his residence is a historic building and must remain so and maintained. The latter is being called into question. It needs a lot of work.

Any questions feel free to call or email me, Karol Szymula, President, Belzair Property Owner's Association, 248-250-0112.

The following covenants, conditions, restrictions, easements, reservations and agreements are hereby imposed on all lots in:

Re-Plat of Belzair Subdivision, a subdivision of part of the Northwest quarter of Section 15, Town 2 North, Range 11 East, Troy Township, Oakland County, Michigan, according to the Plat thereof as recorded in Liber 69 of Plats, on page 7, Oakland County Records.

(b) No structure shall be erected, altered, placed or permitted to remain on any building plot containing less than one full lot as presently subdivided, unless additional land is acquired outside the confines of said Subdivision and added to the area of such lot, in which case the total lot area must be not less than 23000 square feet after division and the frontage thereof must be not less than 110 lineal feet.

Greetings,

Our request for a permit to add a new garage to our home was denied by the City of Troy Building Department. The code requires the garage area not exceed 75% of the first floor living space.

We are requesting relief from counting the square footage of the covered driveway (between the old and the proposed garage) in the calculation of total garage area.

Existing Garage Size	660 square feet
Proposed Second Garage Size	1,190 square feet
Total Enclosed Garage Area	1,850 square feet
Covered Driveway Area	1,775 square feet

The combined area of both garages is 1,850 square feet, which is 69% of the first floor area, well within the 75% maximum. The proposal was rejected because the City added the square footage of the covered driveway to the total garage area.

Our understanding of the intent of this code is to prohibit oversized pole barns and storage sheds. This addition adds architectural features to the home and is not out-of-place. The driveway, which is open in the front and rear, will not present an obstruction to the neighbor's view from across the street.

Additionally, our lot is five acres and the width is 167 feet. The front setback of the house from the street is 90 feet, with this setback the new garage is quite far from the street. Also the location of the house is mostly on the south side of the lot. With the proposed addition, the house will be more centered on the lot (see attached site plan). Therefore the size and the location the proposed garage will not diminish

6/17/2011

neighboring property values. We believe and hope you will agree, that the overall look of the house will add value to the neighborhood.

Attached is the denial letter we received from the building department. We hope you will grant our request and thank you kindly.

Sincerely,

Aida & Sarmad Hermiz

Re: 6763 Donaldson Permit # PB2011-0477

Mr. & Mrs. Hermiz

We are in receipt of your building permit application for a accessory structure/ garage addition to the side of your home at the address listed above

The plans submitted to this office do not meet the requirements set forth in the City of Troy Zoning ordinance for the following reasons.

- Chapter 39 section 7.03 (b) Accessory Buildings in Residential Districts requires that the area of attached accessory buildings shall not exceed seventy-five (75) percent of the ground floor footprint of the living area of the dwelling.
- The plans submitted show the square footage of the existing garage along with the addition would total approximately 2,965 square feet in excess of 75%. The existing ground floor living area is 2,669 square feet

Please submit revised plans showing compliance with the referenced code sections. Therefore your application may not be further processed until this issue is corrected on your plans.

If you should have any questions feel free to contact me

Sincerely,

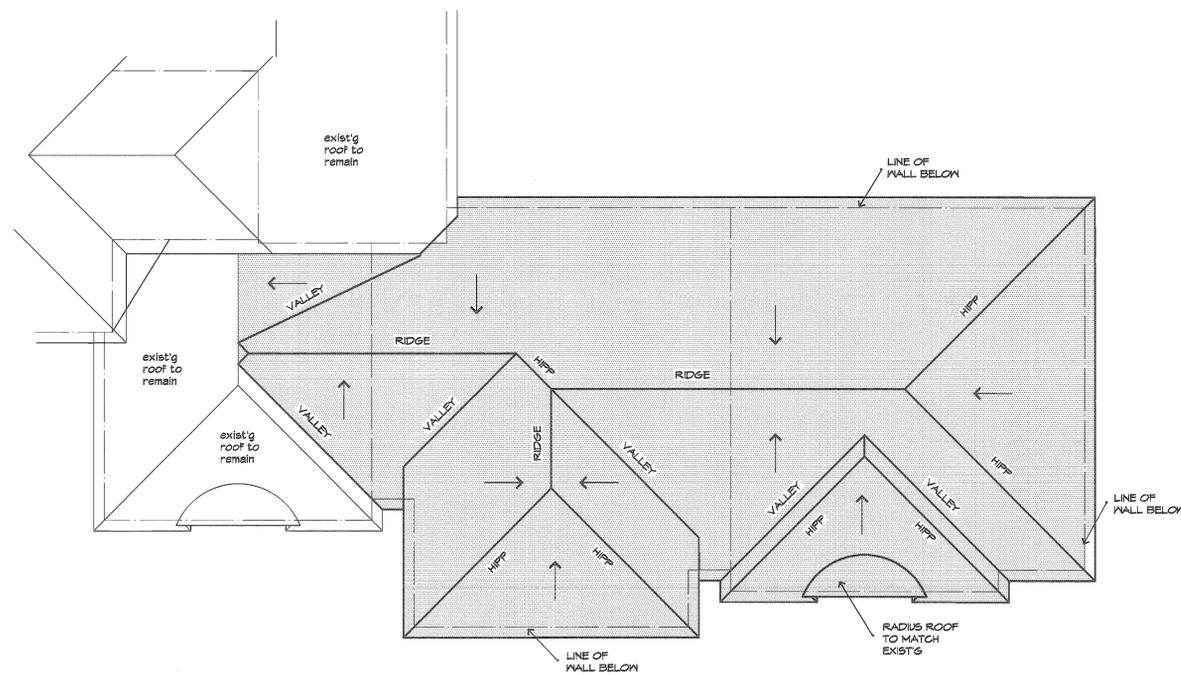

Steve Burns,

City of Troy
July 13, 2011
Planning Department
Zoning Board of Appeals
Item: Residence 6763 Donaldson/ 2965 sq foot garage

We received from the City of Troy a Notice of Public Hearing on 7-19-11 @ 7.30pm. The matter of discussion is the construction of a 2965 sq ft garage by Mr & Mrs Hermiz on their 6763 Donaldson Rd residence.

We are under the perception that these statements will be read at the meeting and have the same value as expressed orally by us in such meeting.

Our position is unchangeable and as follows:

We decisively oppose the construction of this giant garage for the following reasons:

- 1) This is not a rural area.
- 2) A 3,000 sq ft garage does not belong in a residential area.
- 3) Before buying the lot where they later built their house, Mr. and Mrs. Hermiz **knew** of the existing regulations.
- 4) We chose Troy because of its rules, regulations and zoning ordinances. We abide by them and expect our neighbors to do the same.
- 5) A garage this size would change the landscape of the area.
- 6) If approved this construction would set a zoning precedent which will eventually lower even more the property values in this area of Troy.

Finally we would highly appreciate the Board to let us know ahead of any particulars on this case.

Sincerely, Beatriz/Rodolfo Antonelli

Ref: 1685 square foot variance to construct an attached accessory building
Location: 6763 Donaldson

We strongly object to granting this variance. Adding a 2965 square foot garage addition to the existing home is way too much. If this is granted, then how many others will want a monster garage? This will change the look and feel of Donaldson in a negative way.

We urge you to deny this variance request.
