

Five Organizations Receive Cityworks Exemplary User Award

Cityworks Recognizes Organizations at the Cityworks 2014 User Conference

Sandy, UT — Last week [Cityworks®](#) honored five organizations during the closing session of the Cityworks 2014 User Conference in Salt Lake City, Utah. Each year, the distinguished Cityworks Exemplary User Award recognizes a select group of agencies employing innovative and intelligent applications of Cityworks, further Empowering GIS® in their communities.

"The Exemplary User Award honors outstanding efforts and achievements from within our Cityworks user community," said Brian Haslam, president and CEO of Cityworks–Azteca Systems. "We have great clients everywhere, and as such the struggle is never in finding candidates, but in narrowing down the list. Those selected truly exemplify extraordinary application and usage of Cityworks, and are Empowering GIS for public asset management, addressing the critical needs of the communities they serve."

The organizations recognized are located across North America. Varying in population and industry, they all utilize Cityworks to meet a variety of needs.

2014 Cityworks Exemplary User Award Recipients

City of Hesperia, California

Highland Village, Texas

Milwaukee General Mitchell International Airport (MKE)

St. Johns County, Florida

City of Troy, Michigan

The Cityworks User Conference was held at the Salt Palace Convention Center May 20–22. For more information about the 2014 Exemplary User Award winners, visit www.cityworks.com.

About Cityworks

Since 1996, Cityworks® has been streamlining the way agencies manage public infrastructure and property by combining the asset geodatabase with the business logic of agencies that care for infrastructure and property. An authoritative resource and system of record, Cityworks elevates Esri®'s ArcGIS® Location Platform specifically to manage workflow, schedule resources and prioritize activities—saving time and improving operational efficiencies. Time-tested and proven technology, Cityworks is Empowering GIS® at more than 500 organizations around the world.
