CITY OF TROY  
CITY MANAGER'S OFFICE

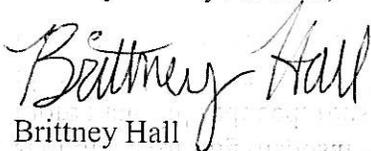

Dear Mr. Nelson,

Hello my name is Brittney Hall and I am currently taking an environmental science class at Oakland Community College. Our class just finished learning about global warming and how to make the place we live in a cleaner, healthier environment. I'm writing with regards toward the routine that the city of troy has for recycling.

I feel that what the city of Troy has done with recycling has made a big impact. I like that every house hold in a lot of the suburbs in troy have the blue bins for recycling. I feel that it is very beneficial for all of us to get in the habit of recycling because it helps save our environment and our natural resources. I was reading the "Troy Today" magazine and it said that avoiding disposal fees is one of the primary goals of any recycling program. The more material reduced, reused and recycled the less waste disposed. The less waste disposed the fewer trash pick ups are required and the lower the disposal fees. Any way to decrease waste handling costs will add to the success of the program.

I feel that this is a great program and I feel that it is only going to help our environment and to be able to save and reuse our resources. In order for this to be effective we need to keep this program going.

Thank you for your time,

  
Brittney Hall
