Dear Carol K Anderson,

Recently The Michigan Department of Agriculture has decided to move forward with the proposal to eradicate the Emerald Ash Borer. This is a destructive, Asian insect found attacking Michigan's as trees. In doing so many subdivision trees had to be cut down, including the one in front of my house. I was not happy with the fact that I was going to loose the tree that provided so much shade for my driveway ever since I moved in my house. However, I know I knew it had to be done to prevent the spread of this infestation. I must say that I was very happy with the efficient job done by the urban deforestation companies. They seemed to get the job done extremely quickly and did a very good job cleaning up. I would like to thank the city of Troy for cleansing us of this disease and doing all they can to stay on top of things and stop this insect before it became too much of a problem. Furthermore I would like to thank troy city officials for making this city such a beautiful, safe and relaxing place to live.

Sincerely,

A handwritten signature in black ink, appearing to read "Ryan Mandziara". The signature is written in a cursive style with a large, sweeping initial "R".
